

# BRC UPDATE

WC 30/07/2014

## MONDAY 30 JUNE

### Last week works completed included:

- Breaking out all the concrete required to locate the new electrical switch intake outside A014 & in A019.
- Soft strip of A019 and lobby areas.
- Hoarding works to Avenue and Bishopsfield Road were completed.
- New gas pipes were installed.
- Trial excavations for services were undertaken.
- We damaged the water connection and re-connected it within 90 minutes to ensure Avenue 141 could operate.
- S building's new Mac suite furniture has all been relocated.

### Works this week will include:

- The installation of a new gas pipe which needs to be connected into the existing gas pipe. The existing pipe is only 250mm below ground and the new pipe will be located 1.5m below ground which will allow our main contractor to carry out their work without further disruption to gas supplies. Please therefore note THERE WILL BE NO GAS SUPPLY from 2pm Wednesday 2 July until early morning on 3 July.
- The internal hoardings will all be complete by close of play on Wednesday 3rd July. We are using wooden close-board fencing within the campus to soften the feel of the contractors areas.
- The trench for the new electrical intake in A building will be completed.
- Crushed concrete will be delivered on site to commence the construction of the haul road off the Avenue.
- Rewiring of S building Mac Suite will be complete on Tuesday ready for the Macs to commence relocation by our IT team later in the week.

Works to the William Price Trust building have continued this week. The summer moves schedule has now been published. Finance are due to move up into their new home on Thursday/Friday this week once new ceiling tiles arrive on site in the morning.

I would like to thank everyone for their continued patience whilst the works are carried out and thank our Estates & iLRC teams for their particular support to this process.

Peter Marsh
