ISSUE 32

Contract Update - Week 44

This week's newsletter is a bumper picture special which shows the progress that has been made on site over the last two weeks.

The steel frame for the atrium between A building and the new building was erected over the Easter Holiday.

The concrete lift shaft will house the new lift providing access to all the upper floors of A and B building plus to first floor of the new building.

After testing three different shades of mortar we chose the darker grey mortar as shown on the left of this picture for all of the engineering brickwork around the ground floor of the new building.

BRC PROGRESS UPDATE

We've begun to fix the new fire and emergency alarm cabling onto the ceiling of the ground floor of the new building

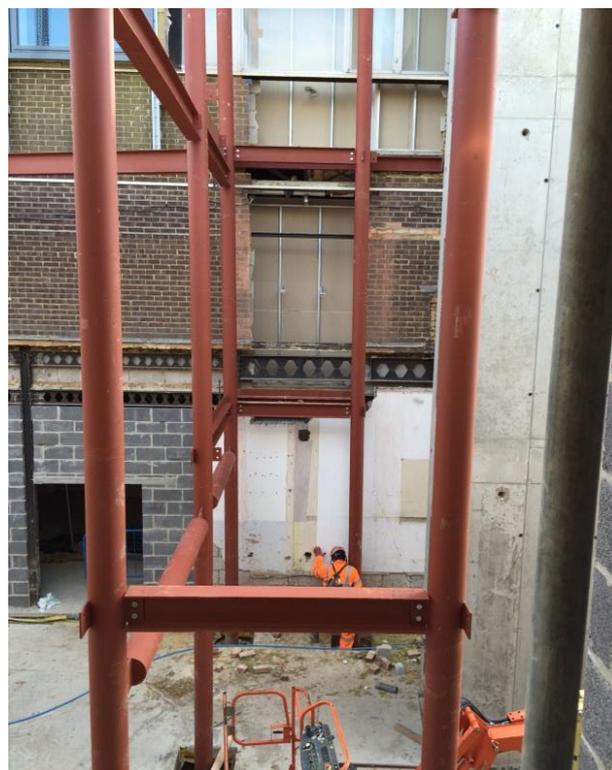

This space will become our new digital studio for gaming and computing right at the front on the ground floor of the new building.

The new building has some beautiful concrete columns inside the building. This one is in the new Salon 141 training suite.

This photo shows where the new bridge will link the new building into the first floor of building A

BRC PROGRESS UPDATE

This photo is taken from the first floor of the new building. The internal partitions which will split the space into the theatre, dance, media and music will be installed in the next month.

This shows the ground floor of B building, looking out onto the courtyard, where windows are being installed to the new fitness suite

The curtain walling on the ground floor of B building is being installed

We've completed the new roofing on the sine storey of A building (above the photography workshop). The link between A and B has now been re-clad with feature slit windows which reveal views across to C building and the new building.

BRC PROGRESS UPDATE

This is one of the new science lab's on the first floor of B building with gas and water pipes connecting to four central stations.

This photo shows one of the new IT lab's on the second floor of B building. The new lighting is now in place and the ceilings and decorations will all be complete in the next three weeks.

The contractor has begun clearing the soil ready for the landscaping and installation of the MUGA on the east of the College site

Over Easter we've moved the heating of all of the North Site (buildings A-D) to the new Energy Centre. Our old oil fired boiler house continues to supply hot water to the South of the site.
